

Assessment-Node JS + Express

Deadline: Monday, Oct 14, 2019, 9am.

Note: This assignment must be submitted on GITHUB.

1. Create 5 basic Create/Read/Update/Delete REST APIs in **Node Express.js** on the system of your choice using

async await,
async auto,
async waterfall,
generators and
Promises.

The APIs should adhere to the:

Javascript ES6 standards as previous assignments were submitted.

Coding conventions should be followed and
the APIs should be **well documented**.

All the APIs should be available via **Swagger** for testing.

Database is not **mandatory** to use.

If need arises, the data can be read/write from the file.
